PROJECT OVERVIEW

More than 46,000 linear feet of custom architectural railing systems span Highmark Stadium, home of the Buffalo Bills. Featuring 75+ custom railing styles, the extensive scope includes glass, cable, picket, drink rail and LED-integrated systems throughout seating bowls, concourses, premium clubs, suites, grand stairs and field-level spaces.

Sightline coordinated design engineering, production and installation across a wide range of structural and architectural conditions. Custom aluminum, stainless steel and steel railing solutions support safety, durability and clear sightlines while complementing the stadium's distinctive architecture.
