

Project: Circo Hermanos Vazquez
Customer: Circo Hermanos Vazquez

Location: Houston, TX
Completion: May 2014

Scope: Since its inception in 1969, Circo Hermanos Vazquez has grown into an iconic circus entertainment group that brings incredible acts to audiences across the globe. When the company chose to replace its infamous center ring, along with the ring barrier and surrounding platforms, Sightline Commercial Solutions was ready in the wings. Comprised of a custom-rolled, aluminum extrusion ring barrier, nearly 400 standard and custom deck platforms, 1,600 SC90® support legs and several heavy-duty ramps, the new ring system was specially engineered to bear the weight of horses, elephants and other circus animals, complete with portable platforms outfitted with a highly specialized hoof-friendly rubber surface. From the “Wheel of Wonder” duo and choreographed acts of roller skating to the “Super Tumblers” acrobatic group, freestyle motocross and BMX stunt shows, Circo Hermanos Vazquez truly is a spectacle to behold.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
