

Madison Square Garden

Hockey Arena

Project: Madison Square Garden
Architect: BBB Architects
Completion: August 2013

Location: New York, NY
Contractor: Turner Construction

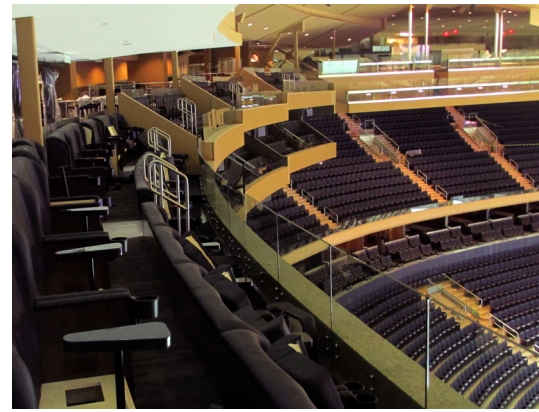

Scope: Sightline Commercial Solutions was proud to work on the renovation of the Madison Square Garden Arena. The arena's reputation extends beyond its physical presence, as the term "Madison Square Garden" has become synonymous with significant sporting events and entertainment performances. It is one of the world's most famous and historically significant entertainment venues. Originally opened in 1968, the current Madison Square Garden is actually the fourth incarnation of the arena on the same site. We designed, engineered and installed over 16,000 linear feet of our incredible ornamental railing including: Track Rail™ guardrails with glass infill along vomitory entrances to reduce sight lines, marble topped beverage railing lining the perimeter of the bowl seating area, glass in suite areas with attached beverage rail and courtesy aisle railing throughout the facility. Our glass railing can also be found on the famous Chase Bridges which suspend over the fan seating areas.

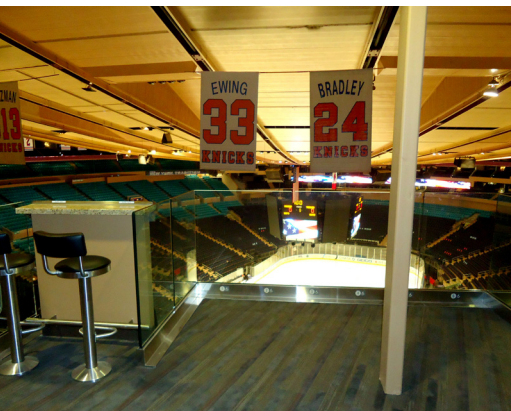

Track Rail glass railing system utilized on the innovative Chase Bridges keeping fans safe while providing great sightlines.

Track Rail with stainless steel handrail welcome fans into seating areas. Bottom 9" of glass was sandblasted.

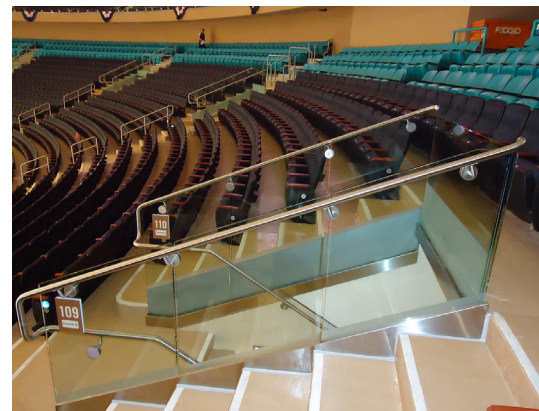

Point™ supported glass railing used at front of seating areas.

Track Rail glass railing used at ADA seating areas offer unobstructed views.

Stainless steel Gripail™ aisle railing used throughout the arena.

Track Rail used at front of seating area with custom cladding.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
