

# University of St. Thomas

## Hockey & Basketball Arena

**Project:** Ryan Companies  
**Customer:** Ryan Companies  
**Completion:** November 2025

**Location:** Saint Paul, MN  
**Architect:** Crawford/Ryan Companies

**Scope:** In 2020, the University of St. Thomas received approval to elevate its athletic programs from NCAA Division III to Division I, bringing increased expectations and requirements for the university's athletic facilities. As the new home to the Division I Tomcats hockey and basketball teams, Lee & Penny Anderson Arena required a railing solution that balanced safety, premium aesthetics and event versatility. Conveniently located in Sightline Commercial Solutions' backyard, the project allowed for easy site access and close engagement with the project team throughout construction. Designed as a multi-use arena hosting both hockey and basketball, the venue demanded a guardrail system durable enough for high-volume use but with a sleek, unobtrusive profile. Sightline furnished 1,800 linear feet of Track Rail™ featured throughout the arena, from the front of the bowl to ADA areas and the grand stairs. The custom-fabricated system features 9/16" clear SGP and 13/16" clear SGP glass paired with stainless steel brushed cladding, handrail and top cap.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
