

**Project:** California State University, Long Beach  
**Customer:** California State University, Long Beach

**Location:** Long Beach, CA  
**Completion:** November 2025

**Scope:** Home to Long Beach State basketball and volleyball since 1994, the LBS Financial Credit Union Pyramid is a nationally recognized icon of the university and the city of Long Beach, CA. As part of an effort to elevate the game-day experience and expand premium hospitality offerings, Long Beach State partnered with Sightline Commercial Solutions to install one of the earliest deployments of our Flex Suite VIP seating system. Despite a compressed timeline and evolving design inputs, the system was engineered, fabricated and delivered in just six weeks, highlighting the speed, flexibility and turnkey advantages of the Flex Suite platform. Delivered fully assembled for streamlined installation, each Flex Suite integrates platforms, railings, seating and tables into a single structure that can be installed quickly and reconfigured as needs evolve. Sightline played a key role in bringing the venue's "Courtside Sandbar" VIP experience to life, providing fans with a high-energy courtside hospitality experience that features premium food and beverage options not available anywhere else in the building. The installation included custom logo infill panels featuring Long Beach State branding, along with drink rails, an ADA ramp, cable rail systems, and integrated refrigerator and food-and-beverage cabinetry to support event operations. Furniture provided by long-time collaborator DreamSeat, combined with the Flex Suite system, delivered both premium comfort and modular versatility. Long Beach State can move or reconfigure the setup over time to support changing event layouts, new sponsorship opportunities and future fan experience enhancements, even extending to different venues if needed. This project highlights how premium, modular seating solutions are helping collegiate venues adapt to growing demand for elevated hospitality experiences and flexible event infrastructure.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
