

Project: PGA TOUR Global Home
Architect: Foster + Partners
Partners: Harmon Inc.

Location: Ponte Vedra Beach, FL
Contractor: Clark Construction
Completion: January 2021

Scope: More than 750 PGA Tour employees, who previously spanned across 17 separate facilities, now work together under one roof at the PGA Tour's new Global Home in Ponte Vedra Beach, FL. The 187,000 square-foot headquarters, surrounded by a freshwater lake, features a distinctive indoor-outdoor concept that emphasizes the lush environment while encouraging natural light to flow throughout the building, especially in the Grand Atrium which reaches 44 feet tall at its highest point. Employees scored a hole-in-one with this amenity-rich work environment, which features an indoor golf simulator, four outdoor terraces, six wellness centers and a fitness center, along with nearly 100 meeting spaces and open work areas designed to foster collaboration. Enhancing sightlines and safety throughout the state-of-the-art facility are more than 2,500 linear feet of Sightline Commercial Solutions' Track Rail™ featured in the atrium and across the exterior balconies.

Clear 9/16" laminated glass railing offers unobstructed views and adds a luxurious accent to the 44' tall Grand Atrium.

Nearly 300 linear feet of curved glass Track Rail with custom-extruded aluminum top cap can be found throughout the atrium.

A large custom-extruded aluminum angle with serrated faces to mount the railing system to embedded HILTI channels.

White oak handrail lends a warm, yet modern, look to staircases and overlooks.

Track Rail extends to the exterior balconies, optimizing views of the lush natural surroundings.

2,500 linear feet of Track Rail was designed for PGA TOUR's new Global Home.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
