

OMNI Louisville Hotel

Hotel

Project: OMNI Louisville Hotel
Architect: HKS
Completion: August 2018

Location: Louisville, NY
Contractor: Brasfield & Gorrie

Scope: Dubbed by the Mayor of Louisville as “your new Kentucky home,” the OMNI Louisville Hotel added more than 600 hotel rooms and 225 luxury apartments to Louisville’s growing downtown area, making the 30-story building the tallest and most luxurious hotel in the city. Labeled as the most significant project in downtown Louisville since the KFC Yum! Center, this 1.2 million-square-foot project also includes a grocery store, two restaurants, a spa and fitness center, a gaming area, and an 850-space parking deck. Like its counterparts in Nashville and Dallas, the OMNI Louisville aims to reshape River City’s hospitality scene, attracting larger conventions with 70,000 square feet of flexible meeting and event space, and the Kentucky Convention Center situated just down the road. Sightline Commercial Solutions provided nearly 2,000 linear feet of architectural railing for the project, including guardrail, handrail and picket rail, along with gating and a custom-designed Smoke Baffle system in the lobby and lower-level art gallery to protect against the spread of smoke. Complementing the hotel’s sleek design, custom glass guardrail lines the lobby escalator and surrounds the rooftop pool to optimize sightlines of Louisville’s surrounding cityscape.

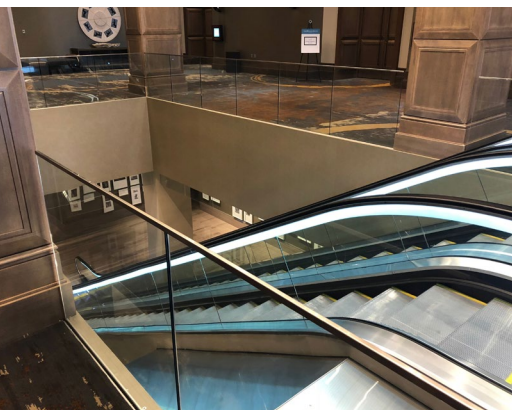

To optimize views, custom SGP laminated glass guardrail surrounds the rooftop pool on the third floor.

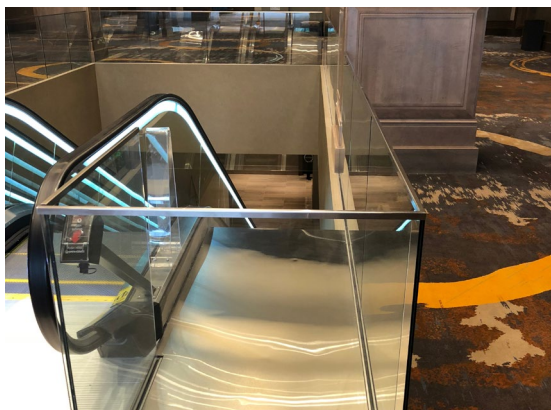

The exterior glass guardrail that lines the rooftop pool area provides an enjoyable environment and outdoor experience.

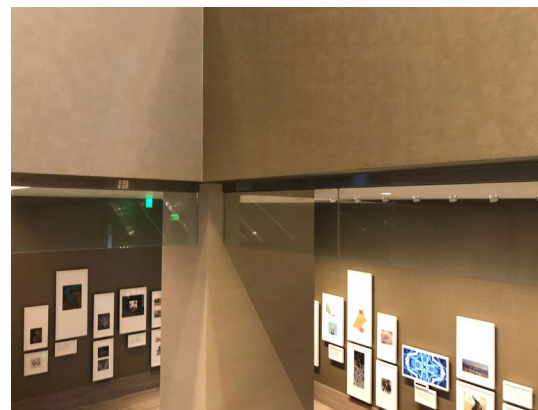

The escalator that guides visitors to the lower level art gallery is lined with custom guardrail featuring SGP laminated glass.

Stainless steel cladding is used on the interior glass guardrail to finish the minimalist look.

Next to the escalator is eight linear feet of welded gating with SGP laminated glass.

102 linear feet of Smoke Baffle with clear tempered glass is seamlessly fastened to the ceiling to prevent smoke from rising.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
