

## Pool Cover

**Project:** Wynn Las Vegas  
**Completion:** April 2017

**Location:** Las Vegas, NV

**Scope:**

Portable staging components can be used to create a level surface over uneven or sunken ground for outdoor receptions and events. They can also elevate an environment – both figuratively and literally. To create an unparalleled experience for guests at the Wynn Las Vegas' XS Nightclub, Sightline Commercial Solutions utilized its SC90® platforms and bridge supports to create a custom pool cover system designed for installation in and over the hotel's outdoor pool to provide a smooth, sturdy surface for performers and guests. The cover system can be quickly set up and taken down so, by day, the pool is available to guests for swimming and refreshment, and then easily transformed into an outdoor dance floor.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
