

# Fiserv Forum

## Basketball Arena

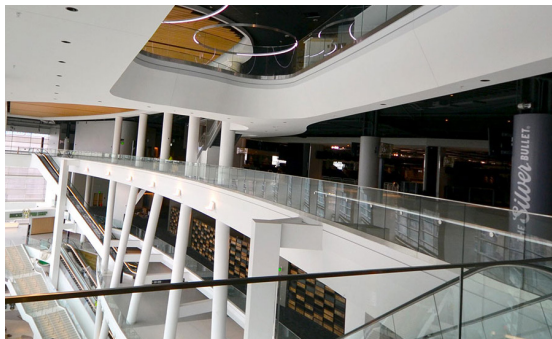

**Project:** Fiserv Forum  
**Architect:** Populous | HNTB | EUA  
**Partners:** Cardinal Glass

**Location:** Milwaukee, WI  
**Contractor:** Mortenson Construction  
**Completion:** May 2018

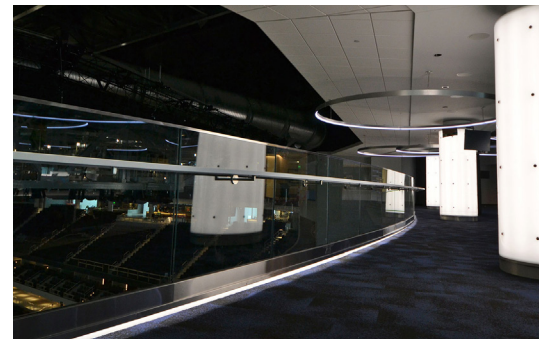

**Scope:** More than just an arena, Fiserv Forum is the central hub for recreation in Milwaukee. To complement the distinctive architectural design, Sightline Commercial Solutions created more than 11,600 linear feet of custom railing systems, including glass Track Rail for the Sky Mezzanine, Panorama Club, East Atrium and Upper Concourse; glass dividers for the Suite Level; and Lexan Panel Rail on the Main Concourse. Additionally, the arena is outfitted with stainless and aluminum grip rail, cable rail and drink rail, along with ADA-compliant guardrails and LED lit handrail – all designed to enhance the open, modern aesthetic while accommodating safe movement throughout the facility.

Track Rail provides a secure, yet unobtrusive, barrier along the concourses.

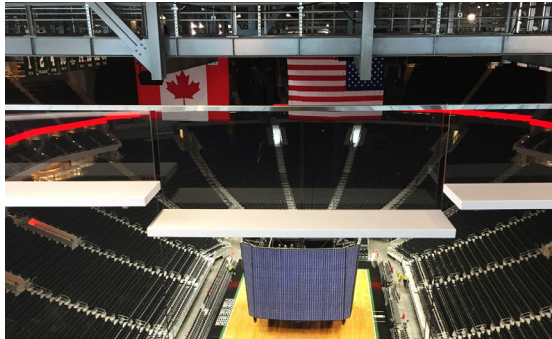

Track Rail is used throughout the arena, enhancing the open nature of the facility.

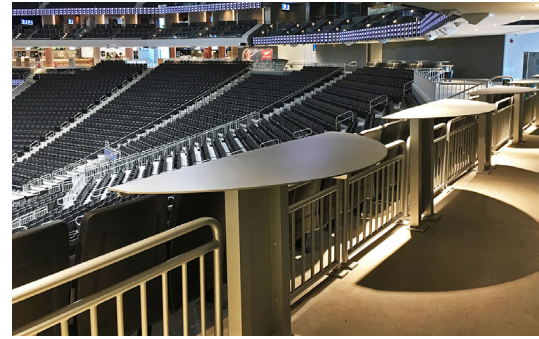

Track Rail top mounted to a rolled steel angle and outfitted with LED lighting.

Custom glass railing with curved panels are among the highlights of the arena.

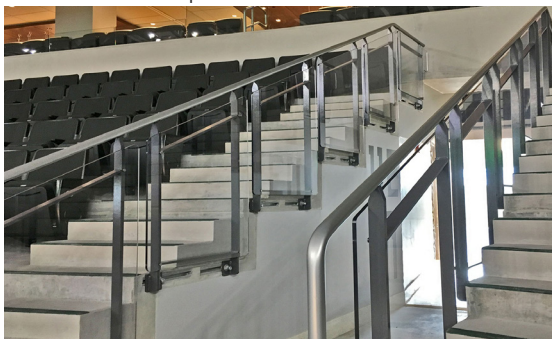

ADA drink rail mounted to glass panels located in the Panorama Club provides accessible comfort.

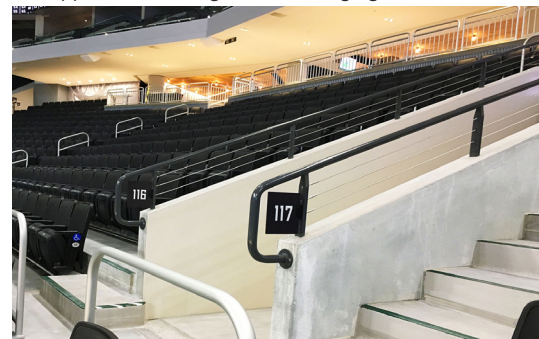

Drink tables offer convenient, "hands-free" support for beverages and belongings.

LED lighting incorporated into handrails on stairs and intermediate aisles.

Lexan Rail features transparent plastic panels and rectangular posts.

Liquid painted steel railing with cable infill brings sleek style to the arena.
