

Project: M&T Bank Stadium
Customer: M&T Bank Stadium

Location: Baltimore, MD
Completion: July 2024

Scope: In the summer of 2024, the Baltimore Ravens enlisted Sightline Commercial Solutions to take the VIP experience at their home, M&T Bank Stadium, to the next level. Sightline contributed to the addition of two rows of sideline seating and approximately 100 new VIP seats in the northwest and southwest corners of the stadium. This enhancement was designed to offer a game-day experience for fans that combined luxury and comfort with optimal sightlines of the field. Sightline designed and fabricated aluminum SC97 platforms and frames, which were engineered into forkliftable sections that streamlined installation and minimized disruptions to the stadium, which regularly hosts events that reach its capacity of 70,745. Aluminum guardrails, step units, and handrails were also integrated to ensure safety and durability while complementing the modernized aesthetic of the upgrades. Additionally, Sightline collaborated with long-time partners to incorporate premium luxury seating to add an extra layer of comfort for fans that choose to opt for the VIP experience. Facing a tight timeline due to the need for NFL approval, Sightline leveraged cutting-edge technology like 3D scanning throughout the project. These 3D renderings allowed NFL officials and M&T Bank Stadium stakeholders to visualize the proposed enhancements, aiding in the promotion of the upgrades and expediting approvals. These upgrades not only strengthen M&T Bank and the Baltimore Ravens' commitment to delivering exceptional game-day experiences but also demonstrate Sightline's ability to deliver innovative upgrades to beloved world-class stadiums.
