

# Simple Stair Unit

## Accessibility

For an easy step up to lower elevation stages, the Simple Step is the right move. It's lightweight, durable and can easily be set in place to give performers and patrons safe access to the stage. Due to its compact size, the Simple Step requires minimal storage space, and its low elevation makes a visible handrail not required. The Simple Step Unit features a tread surface that is composed of 1" (25 mm) structural grade plywood available with a variety of surfaces. This stair option is available in standard and custom sizes.

## Safety & Efficiency

- Lightweight for convenient transport, setup, and tear down.
- Self contained unit. No additional parts or accessories needed.
- For use in performance stage setups where no handrail is required.

## Tech Specifications

### Tread Surface Options:

- HDPE: black
- HDPE: gray
- Carpet: black

### Frame Finish Options:

- Black powder coat
- Custom colored powder coat

### Standard Sizes:

- Tread Widths
  - 36" (914 mm)
  - 48" (1220 mm)

### Rise Options:

- 6" (153 mm),
- 7" (178 mm)
- 8" (203 mm)

- Tread Quantity: 1, 2, or 3

### Tread Construction:

- 1" (25 mm) structural grade plywood.

### Frame Construction:

- 1.66" (42mm) Aluminum pipe tube with formed aluminum tread pans.
