

San Jose Convention Center

Public Space

Project: San Jose Convention Center **Location:** San Jose, CA
Architect: Populous **Contractor:** Hunt Construction
Completion: March 2012

Scope: Sightline Commercial Solutions delivered a tailored ornamental metals package for the San Jose Convention Center, enhancing both the functionality and visual appeal of the facility. The project scope included aluminum perforated panel screen wall enclosures, base shoe glass railings, perforated panel fences and gates, and fritted glass screen dividers—all designed, engineered, and manufactured in-house to meet the unique demands of the high-traffic venue. Working closely with the project team, Sightline ensured seamless integration of these architectural features, balancing durability with design intent. The result is a cohesive system of metal and glass elements that provide safety, privacy, and a modern aesthetic, reinforcing the convention center's role as a landmark public space.

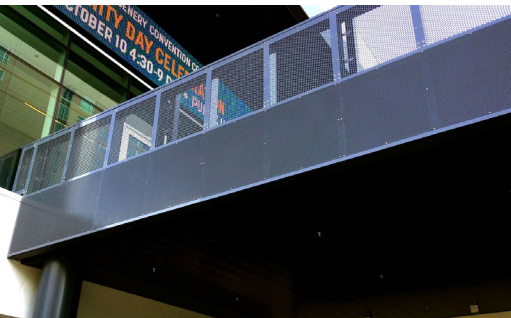

Glass fritted screen dividers.
