

Project: Riverside Resort
Architect: Seibert Design

Location: Laughlin, NV
Completion: July 2019

Scope: To create outstanding and improved sightlines within the existing event space at Riverside Resort in Laughlin, Nevada, Sightline Commercial Solutions engineered a custom seating riser. This demountable solution not only affords layout flexibility to the popular event space, it also allows the resort to host multiple banquets, conferences and performances within the same area. The seating riser was developed using standard equipment in a custom configuration. To support the unique layout of the platforms, SC9600 bridge support systems were provided as a solid and reliable base combined with guardrails, closure panels and LED aisle lighting to promote safety. A custom gate blocks off the space behind the riser to prevent access and foot traffic. This new solution has helped Riverside Resort increase both the utilization and profitability of its venue.

We elevate places where experiences happen by providing innovative engineering, fabrication, and installation solutions to the most complex challenges. Discover our unconventional approach.
